

ANCILLARE

Ancillary Supply Closet

NOW AVAILABLE TO SPONSORS: a convenient, efficient, powerful inventory management and storage program. With a Supply Closet, your entire organization's supplies and equipment are housed together in our depots. When a trial in your portfolio has an urgent supply or equipment need, we simply trigger the needed inventory to be picked, shipped, and delivered. **This is the best on-demand Ancillary Supply Chain program available to Sponsors today.**

Immediate Time & Cost Savings

Reduce global storage costs and time-to-site. Less POs need approval and there's no ordering downtime. We pick and ship from your dedicated inventory.

Centralized Single Supply Source

Our Clinical Development and Innovation Teams streamline and consolidate your ancillary supply and equipment inventory where available for maximum efficiency.

Project Management Oversight

Your dedicated point-of-contact is able to manage your supply chains and track each trial's needs/spend, proactively addressing supply issues by pulling from your closet.

NO EXCESS. NO WASTE. NO WAIT TIMES.

On-demand fulfillment meets centralized storage.

HOW IT WORKS

Because your organization is constantly being challenged to reduce costs while improving efficiencies and the delivery of complex trials, Ancillare's Ancillary Supply Closet program will ensure you always have inventory at the ready. In addition, your trial's ancillary supply budget and timeline will be continuously optimized. Here's a look at how it works:
